

SEA-GP Treasure Chest

Electronic Specialist Reports

85% of GP's in SEAGP have now enrolled in **ihealth**, and are benefiting by receiving specialist reports electronically, just like receiving a pathology result. No more time wasting scanning of paper reports! If you are using Medical Director, you can determine where you would like these reports kept in the patients file. In Medical Director, click Tools, Options, then click on the RSD tab to show the window below:

Click the appropriate button to store the specialist reports in either the **Letters** section, or the **Documents** section of the patients file, then click **Save**.

Contact the Division today to enrol in iHealth while it is still **FREE!**
