

Encourage Medical Specialists & AHPs to Use Secure Email

SEA-GP (Brisbane) would like your help in encouraging Medical Specialists and Allied Health Professionals to send reports and letters via secure email. Medical Specialists sending more than 20 letters per week via post and Allied Health Professionals sending more than 15 letters per week will save money. GP benefits include mail and report/letter processing savings, less errors in filing and scanning patient information and more timely information for better patient care. Consider including a footer on your letters requesting reports/letters via secure email.
