

SEA-GP Treasure Chest (3rd June 2009)

Hidden Reports

Pathology and radiology results downloaded into the holding file are attached to a GP name. SEA-GP has received feedback that some hospital e-discharge summary documents are not listed when viewed under each doctor's name. The documents however are visible when viewing all imported items (i.e. for all doctors in the practice).

Please have a look at all results to check that there are no "hidden" reports/letters waiting to be processed.
